EDUCATION

University of Georgia Athens, GA
Bachelor of Science in Computer Science, Certificate in Applied Data Science, Fintech Expected May 2027
GPA: 3.59/ 4.00
Honors: Management Leadership for Tomorrow Career Prep Fellow, Dean's List, Zell Miller (full tuition), Cousins Scholar
Relevant Coursework: Objected Oriented Programming, Data Structures and Algorithms, Data Science, Linear Algebra, Data Mining

University of Oxford Oxford, UK
Study Abroad Program to Study AI and Computing Ethics Jun - Aug 2025

- Authored papers on the ethical implications of AI and robotics within Oxford's tutorial-based learning system.
- Built a capstone ML/computer vision project analyzing UGA bus occupancy and accessibility for wheelchair users.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++
Technology & Tools: Git, MCP, AWS Lambda, Azure OpenAI, TensorFlow, Pandas, Azure ML, AWS Bedrock, LangChain

WORK EXPERIENCE

The Coca Cola Company | Data Science Intern May 2026 – Jul 2026

- Designed a multistep conversational AI agent (MCP client-server architecture) integrating 5+ tools to give finance teams and executives natural-language, role-tailored access to investment scenario insights.
- Built a reusable offline evaluation harness (Langfuse, Deep Agents) combining LLM-as-judge scoring with deterministic tool-usage checks across 12 scenario cases, reducing hallucination risk ahead of production rollout.
- Built an AI-assisted proof-of-concept using Python and Azure OpenAI to automate 115 validation checks across 7 sustainability reporting packets pre-audit, cutting manual follow-up by ~90%.
- Built a dashboard tracking packet status, validation results, and audit readiness across 74 reviewed files (PDFs, Excel, Word), surfacing missing documentation and calculation errors before audit submission.

Federal Reserve Bank of Atlanta | Fintech Student Consultant Jan 2026 – Apr 2026

- Built an AI agent prototype demonstrating autonomous decision-making to ground policy recommendations in practice.
- Analyzed emerging frameworks for autonomous payment agents, evaluating risks, compliance, and deployment scenarios.
- Conducted applied research on agentic AI in payments infrastructure sponsored by the Federal Reserve Bank of Atlanta.
- Presented findings to Federal Reserve stakeholder as part of a Terry College of Business capstone.

PROJECTS

GenAI RAG Bot for SEC Filing Analysis (Python, AWS Lambda, AWS Bedrock)

- Engineered a RAG system that analyzes SEC 10-K/10-Q filings and scales to 10,000+ companies via the SEC's public API.
- Implemented retrieval to boost answer relevance and ground ~100% of responses in source documents.

AI-Powered Virtual Running Coach (Python, Streamlit, TensorFlow, Scikit-learn, OpenAI API, K-Means, DBSCAN)

- Engineered an AI-powered Streamlit app to generate personalized training plans from 42,000+ historical running records.
- Trained an LSTM (TensorFlow) to forecast future mileage and used an LLM to translate outputs into clear training advice.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Terry FinTech Society | President Aug 2023 – Present

- Conduct weekly meetings for interactive discussions and presentations covering the financial services industry, blockchain, AI/ML, and cryptocurrency from global industry leaders for 150 members.
- Hosted 10+ industry leaders from companies like BlackRock and JP Morgan to connect members with career paths in FinTech.

Nest Run Club | Co-Founder Aug 2024 – Present

- Co-Founded a run club that rapidly grew to ~400 members within the first three weeks through consistent weekly events.
- Negotiate with 12+ local fitness and nutrition brands such as Celsius and Brooks, generating $3000+ in value and enhancing member experience through exclusive perks and events.

ADDITIONAL SKILLS AND INTERESTS

Fluent in Amharic, Running, Hiking, Cooking, Tennis, Arsenal FC, Jazz, Afro beats, Fragrances, Pizza, Harry Potter
